

About Climate Incubator

Established in 2022, Climate Incubator is dedicated to cultivating climate leaders and promoting green employment, building a future capable of addressing the climate crisis. We provide training, mentorship, and an online platform for green job opportunities for young people interested in transitioning to green careers. Climate Incubator also offers green talent and corporate training workshops for businesses, advancing their sustainability journey.

Why Green Careers?

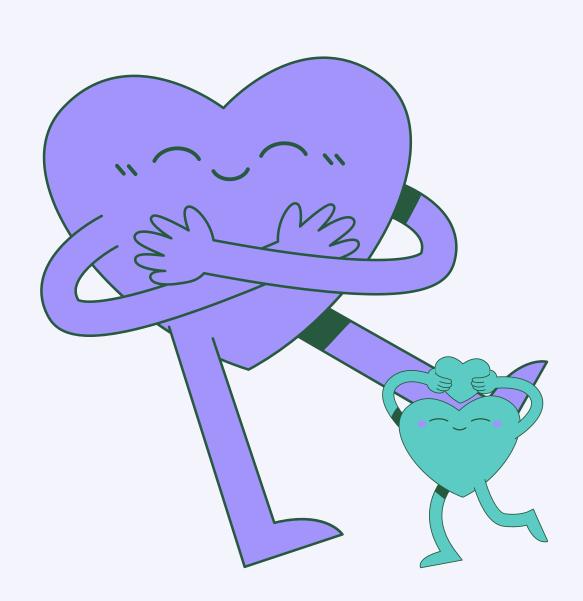

Climate change, resource scarcity, and environmental justice are reshaping every industry. As governments, companies, and communities work toward a more sustainable world, new career paths are emerging—paths that require fresh ideas, ethical leadership, and climate-smart innovation.

Here's why green careers matter now more than ever:

- The global green economy could generate 100 million jobs by 2030*
- Green skills are needed in **every sector**, from energy and tech to design and finance
- Youth-led innovation is driving sustainable change across the globe

3 Key Reasons to Bring These Workshops to Your Students

O1 Seamless Integration with Existing Programs

Our customizable workshops seamlessly integrate into your school's schedule. They can also be offered during after-school sessions, promote career education and develop leadership and teamwork.

O2 Be Future Ready - More Than Just Play

Each session enhances critical thinking, problem-solving, and communication skills while fostering interest in green careers, STEM fields, and environmental innovation, preparing students for future work and a changing planet.

O3Real-World Relevance Through Collaboration

Students engage in guided discussions and group challenges, developing critical thinking, teamwork, and constructive dialogue skills essential for modern problem-solving.
